

## Evaluating And Testing Lacto-fermentations Across the Country

Are you a fermented food fanatic? A kimchi lover? A kombucha connoisseur? Olive obsessed? Passionate about pickles?

Participate in a short survey about fermented foods and be entered into a drawing for a \$50 Amazon gift card.

We are researchers from the University of California Davis Department of Food Science and Technology conducting research on fermented fruits and vegetables and are eager to learn from you. Help us understand which types of fermented foods are the most popular and why you choose to eat these foods. We're also curious if you ferment your own food and what resources would be most valuable to help ensure you have successful home ferments.

The anonymous survey will take less than 10 minutes to complete. If you provide an email address you will be entered in a drawing for a \$50 Amazon gift card. Your survey responses will remain anonymous if you choose to enter this drawing.

To participate in the survey, follow the link below or scan the QR code using your smart phone.
