

Food Safety Training and Regulation Barriers: Identifying Areas for Improvement in Trainings for Small-Scale Food Processors

**We need YOU! To partake in our study
to understand the barriers to food
safety training and regulations.**

Our goal is to:

- **Identify barriers to food safety training among small-scale food processors**
- **Develop strategy to create more audience-targeted food safety training programs**
- **Elicit advantages and disadvantages of in-person and virtual food safety training programs**

Participants will be compensated \$75 for their time.

See the QR code below for a registration survey
